## University Questions

**A1:** In a few sentences, please provide feedback on your learning experience in this course. Consider the assignments and feedback you received, materials, learning activities and interactions with peers, your interactions with the instructor and other aspects related to your learning experience that you want to mention.

Professor Drew is a phenomenal teacher. It is a WEB class, but he was always quick with his responses and was there for whoever needed help. He always provides ample time for work. I would highly recommend his class to any student who is taking an EARTH 101 class here at Penn State Abington.
This course was a great learning experience. The assignments were helpful and related to the content provided. The activities were fun and engaging. The instructor's feedback was helpful and feedback was always provided on activities.
Drew was a fantastic teacher who is clearly very passionate about what he does. He lives and breathes the weather and is always excited to share his knowledge on the topic with his students. He is also a very charismatic and outgoing person which can keep a student engaged in the class, even if the class was online. The way the class was structured was effective, and made learning more engaging.
My learning experience was very good. I appreciated the way that the teacher communicated with me and made sure that nothing was going wrong when I feel behind. The assignments and quizzes were very helpful and the teacher allowed for extra time to be used and for us to take our time when need be. I would highly recommend the class and the teacher with the environment that he provided.
I think this class overall was a valuable addition to my college experience and I genuinely enjoyed it.
The best online course I have ever had. The teaching methods Mr. Anderson uses help me understand what is being taught. By using movies and videos during quizzes and in the modules it keeps the class and coursework really interesting and fun.
Great! always allows questions and works with you on one!
I love comparing movies to the real science of the world. I love that this class is a work at your own pace. It made it way less stressful because I could start a unit before one of my shorter classes started.

		Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	N	Mode	Median	
		1	2	3	4	5				
<b>A2</b>	The overall structure of the course (content and materials, assignments, activities) promoted a meaningful learning experience for me.	-	-	-	1	8	9	5	5	
<b>A3a</b>	The instructor created a welcoming and inclusive environment.	-	-	-	-	9	9	5	5	

**A3b:** In the space provided, please provide an explanation for your rating in the previous question.

He was always gladly willing to provide assistance to anyone that needed it.
The teacher took the time to communicate with me about what was happening during the semester and even offered me extra credit due to me working ahead in the last couple of weeks.
I enjoy WEB classes as it is always a welcome and good environment for me.
The class felt very natural and comfortable for me.
It is a web course but we do have to comment on our current events and it is very welcoming.
I think that the instructor did a great job of this even with this class being online and never meeting in person. I think that telling us that we did not have a video ourselves it helped. I don't like watching a video of myself and being able to cut that out made me feel so much more relaxed and ready to tackle the assignment
Online class. Sent videos to help learn
The instructor was kind and encouraging. He was lenient with due dates (given two days after date to submit). I never had any issues with the instructor or felt like I couldn't reach out if I needed to.

**A4:** If your course required materials, which materials or resources enhanced your learning? How?

I only needed my computer. There were real life activities we did though that were simple, yet effective in showing how weather events occurred in nature.
--

It did not require materials.
It required no extra materials
The course only required a computer and internet access for the class. He provided the rest of the material and this was very beneficial. I really enjoyed the movie assignments because I was able to get the understanding and see where some movies made scientific errors.
The only materials that were required were when we had to complete some activities.
N/A
There were materials but most were online or free. Everything was fine and easily accessible through Canvas.

**A5:** What are the most important things you learned in this course?

I learned a lot about the different natural disasters that I did not know about. Being from a landlocked state you often hear about hurricanes and tsunamis, but you don't understand the severity of them because you are not affected. This class has really helped me understand.
How volcanoes form and earthquakes and many other things.
All in all, that weather is a complex subject that has effects on the world that I was not aware of at first before taking this class. Also, that there are different ways for events, for instance, volcanoes and earthquakes to occur.
New things about science and why things react
I learned many important things about our planet that will stick with me throughout my life.
The most important thing I learned about in this course is about the many different types of natural disasters and the different type of things they cause and how they are caused.
The contents of this class
I learned a lot about the earth's natural disasters and how they work.

**A6:** Do you have any recommendations for this course?

N/A
n/a
No
Nothing at all.
I do not have any recommendations for this course. I enjoyed the course as it was presented to me.
Yes, I would highly recommend this course to anyone who has an interest in EARTH 101.
Not really, there was clearly an effort on Drew's behalf to provide the best learning experience possible through an online class.
